

Government General Degree College, Chapra

Internal Assessment- 2nd Semester, 2019-20

Physics- General

Paper: PHY-G-CC-T-02

Total Marks: 15

Time: 45 minutes

Answer any three questions only:

1. Establish $C_p - C_v = R$ where the symbols are of usual meanings. 5
2. State the principal of equipartition of energy. Define degrees of freedom. For a diatomic gas, how many transitional degrees of freedom are there? What is Boyel temperature? 2+2+1
3. What is meant by internal energy of a gas? Is this a state function? Under what conditions a process will be reversible? When will the efficiency of Carnot Engine be 100%? 1+ 1+1+2
4. Define average velocity and r.m.s velocity of gas molecules. Keeping pressure unchanged, at what temperature the r.m.s. speed of nitrogen will be double of its r.m.s. speed at N.T.P.? 2+3
5. Write Maxwell's law of distribution of molecular speeds. Draw the distribution graph. Write down the van der Waals' equation for 'n' gm-moles of a real gas. 2+1+2
6. Prove that the ratio of two specific heats of a gas is $\gamma = 1 + \frac{2}{n}$, where n is the number of degrees of freedom. Explain, how water remains under ice slab in polar region. 3+2
